### **ONE SHADE MEETS ONE EXPERIENCED FORMULA**

#### **Kulzer launches Charisma Diamond / Charisma Topaz ONE Shade**

**“One for the basics. All for the details.” With this message, Kulzer launches a one-shade composite solution for the majority of everyday cases: Charisma Diamond ONE Shade / Charisma Topaz ONE Shade. Due to its incredible shade matching properties, a restoration with the new ONE Shade becomes invisible by blending into any surrounding dentition. ONE Shade saves time as no shade selection is needed. Based on the Kulzer experience and know-how in modern composites, Charisma Diamond and Charisma Topaz ONE Shade come with the huge advantage of being integrated into a family of composites that have been scientifically evaluated and documented in numerous clinical cases for many years. Charisma Diamond / Charisma Topaz are appreciated by dentists worldwide for their efficient handling, strength and aesthetic possibilities.**

Hanau - 16.11.2020. ONE for the basics: Charisma Diamond / Charisma Topaz ONE Shade are used for basic restorations, e. g. in the posterior region. ALL for the details: All known Charisma Diamond / Charisma Topaz shades cover the more complex and aesthetically challenging cases, e. g. in the anterior. Altogether, they stand for one efficient and reliable solution independent of one-shading or aesthetic layering demands.

Charisma Diamond / Charisma Topaz ONE Shade blend seamlessly into the surrounding dentition, independent of the tooth shade, enabling restorations to simply disappear. Dentists not only meet the same easy and convenient handling as with Charisma Diamond / Charisma Topaz. They can also expect the same enhanced mechanical properties of Charisma Diamond / Charisma Topaz that have been confirmed successfully in various scientific studies worldwide. The confirmed resistance to chippings and fractures allows the filling of even large cavities with confidence to satisfy patients' demands. The combination of these underlying prerequisites makes the composite so ideal for everyday cases.

The unique TCD-matrix and the optimised nano-hybrid filler system lead to exceptional flexural strength, minimal shrinkage stress and high wear resistance which can reduce the risk of chippings and fractures. The innovative formula thus enables long-lasting restorations with a permanent, natural lustre. Both composites also have high radiopacity, ensuring a reliable diagnosis.

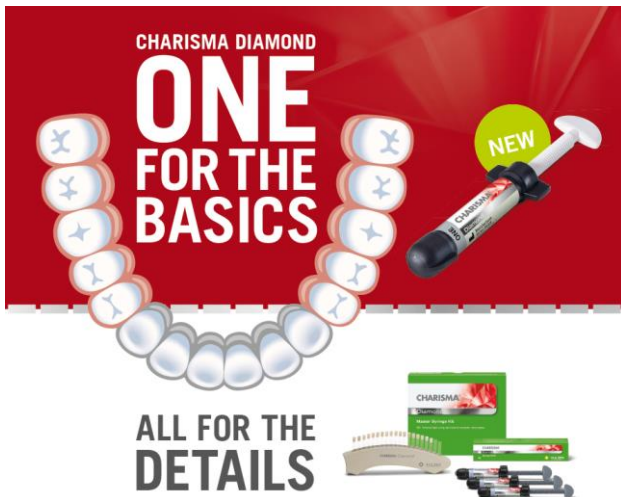

Dentists do not have to change their handling habits while getting a reliable all-in-one composite. Charisma Diamond / Charisma Topaz are stable and equipped with very low stickiness and offer an extended working time. Their non-slump qualities provide for easy carving and sculpting. Both provide ONE shading and unlimited possibilities for the aesthetic zone. There is no need for a second line of composite.

Charisma Diamond / Charisma Topaz ONE Shade are truly universal-shade composites for everyday cases with enhanced mechanical properties. With Charisma Diamond / Charisma Topaz ONE Shade dentists can confidently skip the step of colour selection and still expect highly aesthetic and also long-lasting results. The Charisma Diamond / Charisma Topaz ONE Shade Kits are now on offer. Dentists may contact their local sales representatives for more information.
